The influence of the East Japan earthquake

Dear Customers,

Thank you very much for your big concern about the gigantic earthquake which hit Japan last week.

Following is the newest status at Internix

- Fortunately, all the Internix employees and their families incurred no physical injuries or damages.
- Also, we have no damage on our buildings, warehouse or equipment.
- The delivery of the products is anticipated to be affected by the shortage of electricity supply and traffic congestion associated with this big earthquake.

Although, we shall do our best to keep the delivery and the supply of the products as much as possible by increasing the personnel involved, we appreciate your understanding about the difficulties we are facing.

Best regards,

Hideyuki Yui
President and C.O.O.
Internix, Inc.
